# About Us

With many years experience in the design and manufacture of diesel generating sets our management team ensures every MF Power Series generating set will provide reliable power and peace of mind. Whether used daily on the farm or as an emergency precaution, you can be assured our talented team has created a power solution with you and your needs in mind.

Each Massey Ferguson Power Series generating set is manufactured at the modern factory facilities in Northern Ireland, which is part of the United Kingdom. Northern Ireland has a proud history in engineering that dates back over three hundred years. Pneumatic tyres, tractors, four-wheel drive systems, ejector seats, aeroplanes and ships are just some of the products that have been invented, designed or manufactured in Northern Ireland. It is also the birthplace of Harry Ferguson, one of the great innovators of the 20th century. His legacy lives on and is embedded in the MF Power Series range of generating sets.

All our machines up to MF970 Series are produced on powered automotive style assembly tracks by skilled operatives prior to load and functional testing in advanced test cells. The largest machines are assembled in a ultra modern high bay assembly hall with the most advanced testing facilities, available for multiple units up to 4000kVA capacity (low or high voltage).

Whatever your application, you will find a Massey Ferguson Power Series generating set to meet your needs.

# Choose your perfect generating set

## **MF930 Series**

### **Power: 10kVA - 66kVA**

Overview: Our smallest range offering you desirable power in a compact package.  
Sectors Served: Telecommunications, Construction, Residential, Retail.

## **MF950 Series**

### **Power: 33kVA - 275kVA**

Overview: Setting standards for others to follow. Full array of additional options.  
Sectors Served: Construction, Residential, Agriculture, Industrial, Commercial.

## **MF970 Series**

### **Power: 275kVA - 710kVA**

Overview: A popular range including models to meet stringent emissions legislation.  
Sectors Served: Industrial, Construction, Mining, Commercial, Events, Utility.

## **MF990 Series**

### **Power: 715kVA - 3350kVA**

Overview: Our largest generating set range, offering power you can depend on, when it counts.  
Sectors Served: Data Centres, Healthcare, Commercial, Industrial, Banking.

# MF930 Series

## 10 - 66 kVA

The smallest range from MF Power Series, the MF930 Series, offers reliable power in an ultra compact solution. The MF930 Series is powered by the world renowned Perkins and Mitsubishi engines and offers optimum fuel consumption.

A range of options are available to tailor your generating set to meet your needs, including optional canopy offering low noise level - perfect for urban locations.

Also available within the MF930 Series range is our telecoms generating set, offering an impressive solution for the telecommunications market. Integral high capacity fuel tanks and 500 hour service intervals are just a few of the many features of this model, specifically chosen to serve its purpose.

# Attention to detail and high standards of engineering

# MF950 Series

## 33 - 275 kVA

The MF950 Series from MF Power Series delivers exceptional performance, reliability, durability and low operating costs.

All models within the range are available in both open and sound attenuated versions, complete with a full array of optional extras to match your requirements.

Powered by the class-leading AGCO Power and Perkins engines the MF950 Series offers excellent fuel consumption and is well equipped to deal with even the most arduous of conditions.

# MF970 Series

## 275 - 710 kVA

From whatever angle you look at it, there is no denying the high standards and attention to detail that have been applied to the design of the entire MF970 Series.

Ready to meet the demands of your industry, the MF970 Series boasts an array of standard features plus a complete range of additional options.

The MF970 Series is powered by Scania engines, with Perkins powering the largest models in the range. These engines offer high performance cooling systems, high uptime, low operational costs and long service intervals - delivering power you can depend on.

# MF990 Series

## 715 - 3350 kVA

The MF990 Series is the largest power range from MF Power Series. Whether it be low or high voltage (3.3-13.8kV), our engineer's can come up with a solution. The MF990 Series comes in open set versions, in canopy (MTU up to MF1100 only) or can be supplied with bespoke containers.

A wide range of technical additional options are available on these generating sets to ensure the ultimate solution. Offering a choice of MTU, Perkins or Mitsubishi engines, the MF990 Series can meet the demands of all your critical power requirements.

# Sound attenuated enclosures

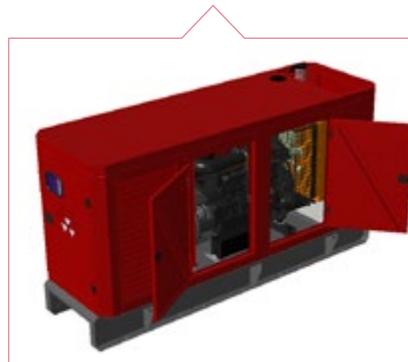

MF Power Series weather protective and sound attenuated enclosures deliver durability and security for your generating set.

Manufactured from pre-treated galvanised steel and coated with polyester powder coated paint, the canopies are designed with low velocity airflow to prevent the ingress of water, sand and dirt.

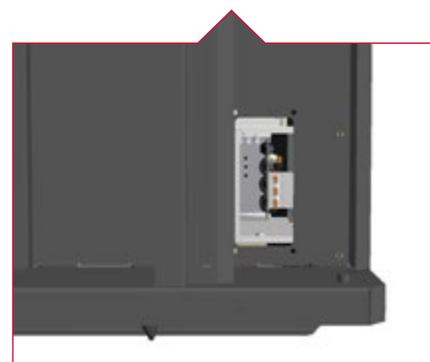

## Noise absorbent materials

Enclosure is fully lined with noise absorbent material, as standard, to ensure low noise levels.

## Servicing made easy

Large hinged doors provide access to all necessary components during installation and servicing. Lift-off hinges also available.

## Convenient cable access

Large aperture cable gland plate positioned below circuit breaker for ease of cable installation.

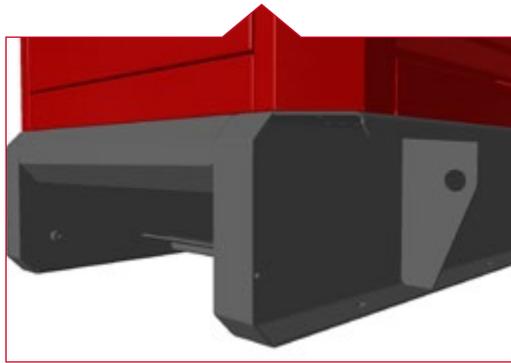

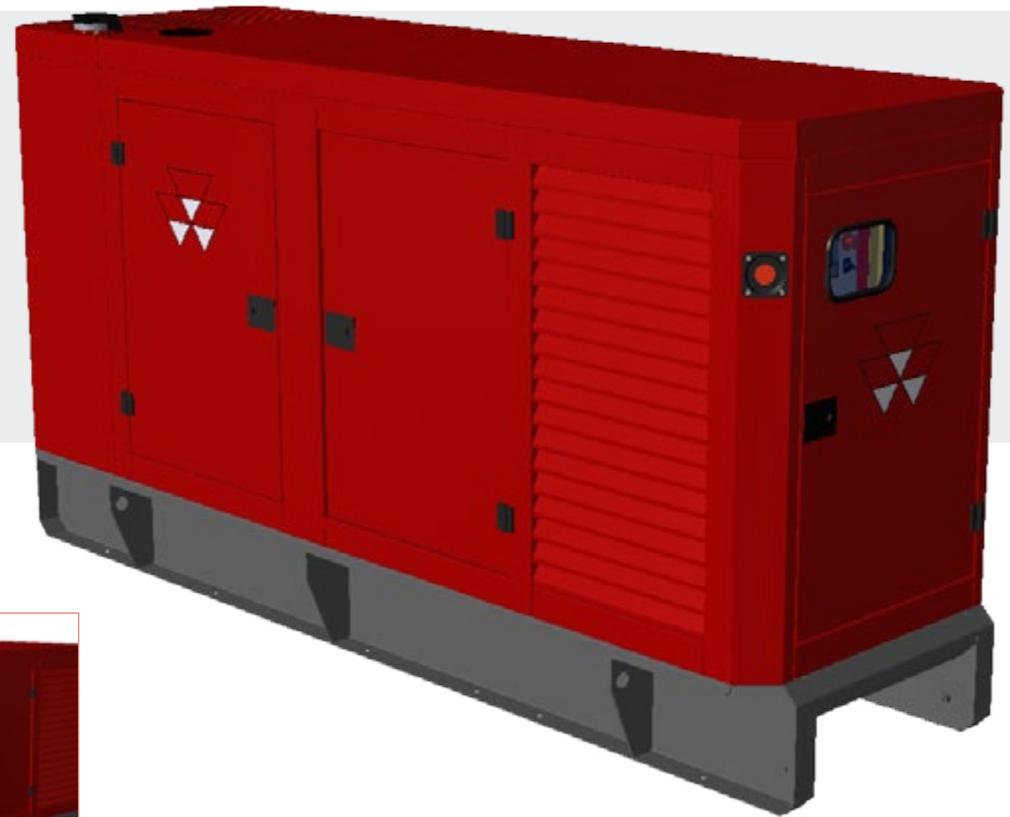

## Internal exhaust silencer system

The exhaust silencer system is safely enclosed in the outlet of the enclosure.

This is extremely advantageous to the operational life of the engine and alternator and will ensure your MF Power Series sound attenuated generating set will operate in even the harshest conditions.

Also available are bespoke containers for the entire range of MF Power Series generating sets.

### Innovative design

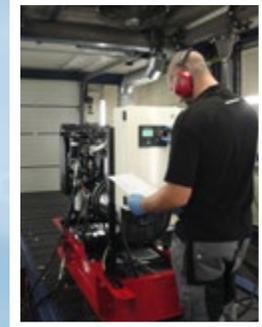

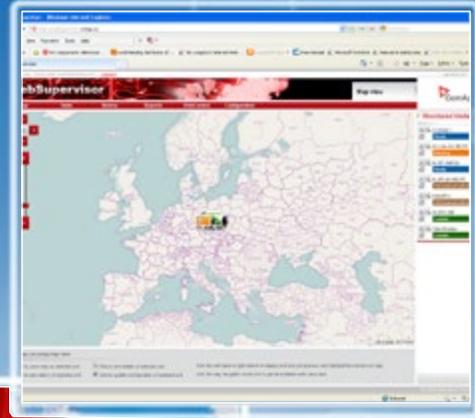

At each stage of the design process each decision is evaluated to ensure a machine has low noise levels, high ambient clearance, low intake velocity whilst having a compact modern style.

### Corrosion & damage resistant

Fully galvanised steel enclosure coated in highly durable polyester powder paint.

**For extra protection**

# Digital control systems

# Operation made easy using the most up-to-date control systems.

MF Power Series can provide a control system to meet all your needs. The modern range of digital control systems offers flexibility for the user, ease of use and optimises the performance of your generating set.

**iLogic3000** - manual, remote start.

**iLogic3200** - manual, remote start, liquid crystal display, full instrumentation and optional remote monitoring.

**iLogic3250** - enhanced InSight3200 model, complete with a host of extra features.

**iLogic4000** - full automatic mains failure supervision capability, optional remote monitoring.

**iLogic6000** - automatic synchronisation of up to 32 units with load management features.

**ATSc** - automatic transfer switch controller to provide automatic control of your standby generating set in the event of a power outage.

## Remote communications solutions

Remote communications options are available with all MF Power Series digital control systems (excluding iLogic3000). Remote communication can give many advantages including reducing the need for site visits, minimising downtime, prioritising maintenance and alarm notification.

**More details:** Full product specifications are available on request.

# Specifications

Our range of generating sets are packed with standard features including robust base frame, low lube oil pressure shutdown, overspeed protection, high coolant temperature shutdown, low battery voltage alarm, battery charging system failure, industrial silencer (optional extra on MF990), 3 pole suitably rated circuit breaker (optional extra on MF990), fuel tank level gauge, emergency stop push button and base fuel tank (not applicable to MF990).

# Tractor Drive Range

# More power to you

MF Power Series tractor drive generating sets are supplied worldwide to a range of applications, mostly in the agricultural sector, however they are highly flexible and can be used anywhere where power is needed and a tractor drive is available.

- Simple and reliable control systems for ease of use
- Robust solid frame and great impregnation system
- Made using the latest technology
- Compact design with high efficiency

## Alternator

Industrial duty with high capacity for electric motors. Self-regulating, synchronous with continuous ratings based on ambient temperatures of 40°C.

## Control Box

The control box is rear facing providing easy monitoring from tractor. It is protected to IP54 and contains Voltmeter, Ampmeter and Frequency meter set. It is fitted with sockets for simple connection whilst protecting the user from mis-use.

## Gearbox

Heavy-duty high quality oil bath gearbox with protective plastic shaft guard.

## Frame

Mechanically welded frame with 3-point linkage system. With easy lifting points for simple transportation.

## Single Phase Tractor Drive Generating Set Range

| Model      | 50 Hz Output |         | RPM Driven Shaft |        | Estimated |  |
|------------|--------------|---------|------------------|--------|-----------|--|
|            | 1ph kVA      | RPM Alt | RPM              | Weight | HP        |  |
| MF TD 25/2 | 16.5         | 3000    | 435              | 200kg  | 50        |  |
| MF TD 30/2 | 19.8         | 3000    | 435              | 210kg  | 60        |  |
| MF TD 40/2 | 26.4         | 3000    | 435              | 350kg  | 80        |  |

Includes: Alternator, gearbox, guard, frame and panel. Industrial, self regulating, synchronous, regulation +/- 4.0%. Voltage/Phase: 220/110V, 1 phase. Alternator speed/Hz: 3000rpm, 50Hz (2 pole).

## Three Phase Tractor Drive Generating Set Range

|        | Model      | 50 Hz Output |         | RPM Driven Shaft |        | Estimated |  |
|--------|------------|--------------|---------|------------------|--------|-----------|--|
|        |            | 3ph kVA      | RPM Alt | RPM              | Weight | HP        |  |
| 2 Pole | MF TD 19/2 | 19           | 3000    | 435              | 132kg  | 40        |  |
|        | MF TD 25/2 | 25           | 3000    | 435              | 200kg  | 50        |  |
|        | MF TD 30/2 | 30           | 3000    | 435              | 210kg  | 60        |  |
|        | MF TD 40/2 | 40           | 3000    | 435              | 228kg  | 75        |  |
| 4 Pole | MF TD 20/4 | 20           | 1500    | 430              | 230kg  | 40        |  |
|        | MF TD 25/4 | 25           | 1500    | 430              | 245kg  | 50        |  |
|        | MF TD 30/4 | 30           | 1500    | 430              | 310kg  | 60        |  |
|        | MF TD 40/4 | 40           | 1500    | 500              | 350kg  | 80        |  |
|        | MF TD 50/4 | 50           | 1500    | 500              | 365kg  | 90        |  |
|        | MF TD 60/4 | 60           | 1500    | 500              | 378kg  | 100       |  |
|        | MF TD 70/4 | 70           | 1500    | 500              | 396kg  | 112       |  |

Includes: Alternator, gearbox, guard, frame and panel. Industrial, self regulating, synchronous, regulation +/- 4.0%. Voltage/Phase: 415/230V, 3 phase. Alternator speed/Hz: 1500/3000rpm, 50Hz (2/4 pole).

# Support. When you need it.

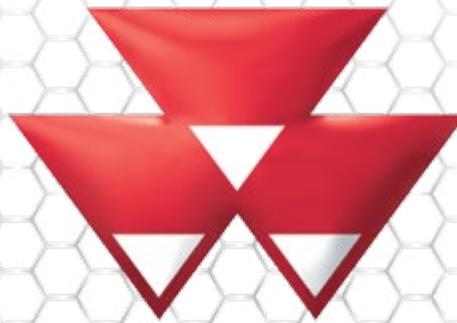

Massey Ferguson Power Series and our extensive network of distributors are committed to finding the right product for you and then supporting you with the best service, parts, training and commissioning, when you need it. We are always ready to go the extra mile to support your purchase.

We can offer tailored generating set training courses from basic to advanced level. These are available on location or at the modern MF Power Series training suite at the factory in Northern Ireland.

One of the key criteria for all our customers is the availability of parts. We recognise this and invest resources in making sure the correct parts are available in the quickest time. We also spend time training our distributors and their engineers to ensure they fully understand your parts requirements.

We are committed to keeping your machines running.
